COURSE COVERAGE

Sound Theory

Acoustics

Digital Audio Workstation

Microphone Techniques

Recording & live tracking

Audio processing

Orchestration

Composing

Mixing & Mastering

Film Sound & Dubbing

Today, you can sit on your laptop and compose and produce music. While the hardware and software to do this are easily available and affordable as well, to make the best use of these requires an understanding of the tools, tricks and fundamentals behind it. Octavium's 'Behind The Music' program enables you with the understanding and a hands on learning experience.

BEHIND THE MUSIC

A Program in
Audio Recording Arts

OCTAVIUM

BEHIND THE MUSIC

'Music is what feelings sound like', goes the saying, and what better way to express those 'feelings' using digital technology easily accessible today! Whether you are a professional interested in learning the nuances of the trade, an amateur wishing to enter the field of music production, or just someone who loves music for its own sake, this short-term course will equip you with the knowledge, skills & hands on experience necessary to fulfil your aspirations.

THE OCTAVIUM ADVANTAGE

Octavium houses a full fledged music academy, a state of the art live recording studio, and an intimate live performance space.

Live studio projects, A/V production of music, instructional/demo content & live performances are integrated into the program for you through live & simulated project assignments, as well as interactions with performing musicians & professionals.

We provide a learning environment that is friendly and supportive, led by mentors who are practising sound engineers, producers, and teaching professionals with industry experience.
